Choices, Choices, Choices

There are so many options out there for you that the choice is really, truly yours!

1. You Could get another Job

Honestly, like all that you are doing now, how? You are so stretched thin now, where will the extra time come from? What will have to give if you do that?

Sadly, the odds are against you. You may find yourself competing with a much younger crowd for jobs. If you pursue an entirely new line of work, you could find that it doesn't interest you enough. You may see that the demands aren't ideal for you.

Not everyone is cut out to welcome Wal-Mart shoppers, fold clothes for ungrateful customers, or make fluffy drinks at the local coffee shop.

2. You could volunteer

This option would give you a chance to share your gifts and knowledge with those in your community or across the world.

To give you a sense of value and purpose.

Unfortunately, volunteering won't add to a limited household income. However, if you do, it is one of the best, most fulfilling experiences available. While it may not make you rich in your wallet, it can make you rich in your life.

You will feel as if you have a purpose.

CHAPTER 3

Choices, Choices, Choices

3. Be Your Own Boss

Another option is that you can use your hobbies and passions... and turn them into cash. Many want a low-cost, home-based business they can run part time so they can still enjoy their leisure and work with less stress.

You can be a part of a business where all of the resources you would need are given to you. You'll receive top-of-the-line training.

You can choose when and where you would like to work. You can embark on a new adventure into a successful market – all from the comfort of your own home.

CHAPTER 4

Working From Home

BENEFITS

✓ **Low Risk** – Most of us, don't like risk and will often do everything we can do to avoid it completely. However, in business, you simply cannot eliminate risks, you learn to minimize them in order to be successful. The advantage of starting a home-based business is that it is a very small risk to get you started.

✓ **High demand for Quality Products** – One of the great things about this business is that people are already purchasing this product!

People *want* the products that you are providing them with the assistance they *need* to get what they want.

The questions that you need to ask yourself:

- Would I use this product if I could not make money from it?
- Will this product benefit a customer outside of giving them a chance to make money?
- Would I make their lives better by providing them with this product?

If the answers to these questions are a "yes," run with it! There is no better time than now to start your incoming cash flow!

CHAPTER 4

Working From Home

- ✓ **Low operating cost** – Unlike traditional brick-and-mortar businesses, this model makes it entirely possible to run a business at low costs. A good mentor should allow you to piggyback on their expertise, knowledge, show you how to find and get leads, and help you generate the funds to pay off your initial investment and get in profit early in the life of your business!
- ✓ **Leverage** – This is a *people* business. It is a business that consists of helping customers find what they want/need and helping others create businesses. It's a perfect example of a 'win-win' relationship – you reap the rewards by leveraging the efforts of those you help.
- ✓ **Flexibility & Freedom** – We can do today what business owners 15 years ago could not do and that's to make our business portable... you can work anywhere as long as you have an internet connection! The internet will also allow you to access people in areas that you would have no access to otherwise (that means other cities/towns, countries, and even continents)! When all the pieces are in place, the life of a business owner in this industry, can be very fulfilling indeed – believe me, I know from experience!
